FORMULA HIGHLIGHTS

Celsius to Fahrenheit

$$F = C \times 9 / 5 + 32$$

ANCHOR VALUES TO REMEMBER

- 1 inch = 2.54 cm
- 1 kg is about 2.205 lb
- 1 mile is about 1.609 km
- 1 UK gallon is about 4.546 litres

TEMPERATURE REMINDERS

- Celsius and Fahrenheit use both scaling and offset.
- Freezing and boiling points are good plausibility anchors.

QUICK CHECKS

- Confirm the conversion direction first.
- Round only after calculating.
- Use the UK gallon specifically where the context demands it.
